Morrisby Career Guidance

Deciding what you want to do after you leave school is not easy. Understanding the options available to you in the first place is hard enough, but then working out what you are best suited to and how you can achieve your goals can be even more difficult.

We are here to inspire you and give you guidance on choosing a career and deciding on study options.

What is involved?

In order to personalise our careers advice, we need to find out more about you. We do this through a range of online assessments & questionnaires, which give us an idea of where your strengths & interests lie.

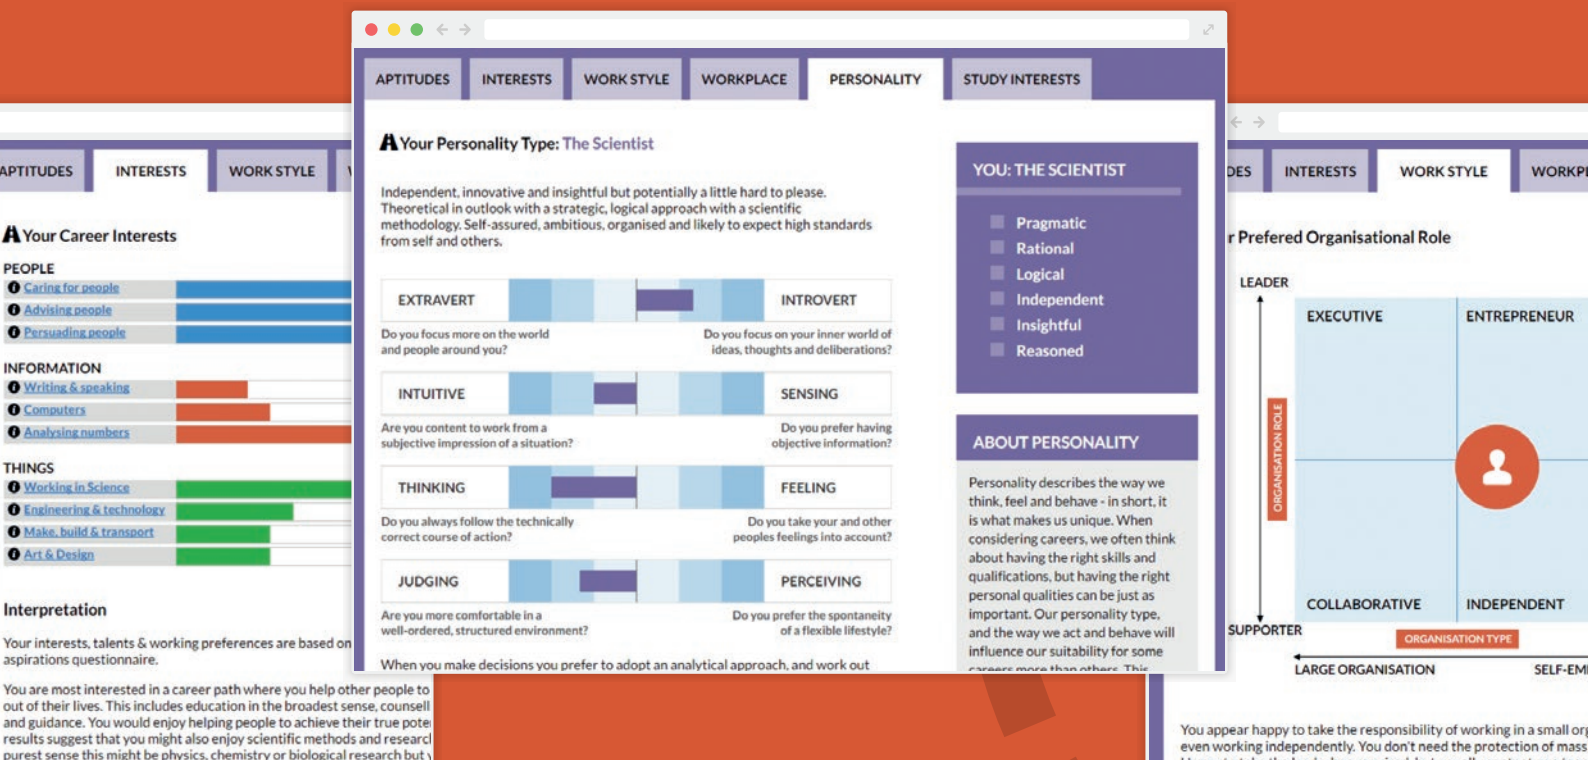

After analysing your results, we give recommendations for careers and subjects that match your abilities and interests. In your own personalised area of the website, you can then research careers, search for courses and add your own ideas into the mix.

Do I need to revise for this?

You can't revise for the assessments. If you want to get a feel for the types of questions you will be asked, go to www.morrisby.com/practice-questions

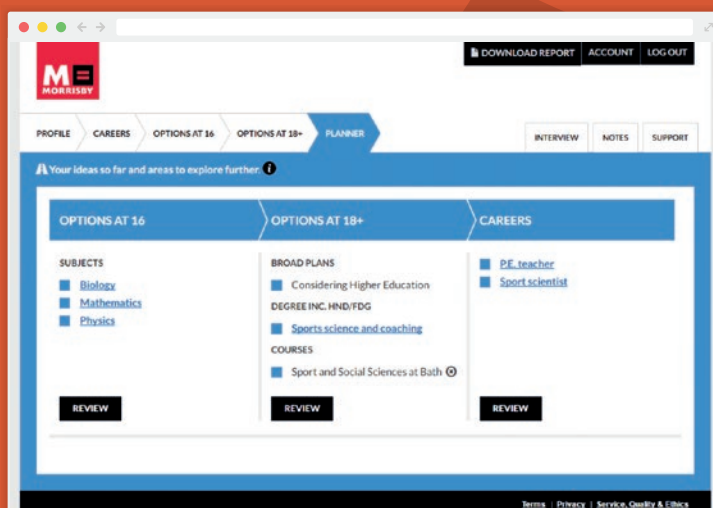

Profile

In the Profile section, you can see all of the results from your assessments. You can re-take the interests and personality questionnaires at any time, although you can't change your aptitude scores.

Planner

Once you have seen your results, you will be able to view your career and study recommendations. In the Planner you can create shortlists of your favourite Careers and Subjects to share with your careers adviser, family or friends.

Your choices at 16

- In this section you can start researching the educational choices you need to make at 16, and add your selections to your Planner.
- We will suggest subjects according to how well they match your assessment results and how useful they will be for entering your favourite and suggested careers.
- For those looking at alternatives, we have information about appropriate apprenticeships and college courses.
- If you have already started your studies, you can select your subjects and add them along with your expected grades to your Planner.

Report

You can download a full report summarising your aptitudes, personality, career interests and preferences, together with your career, subject and course suggestions and favourites.

Login for life

You can return to the website at any time to view your results, update your career interests or work preferences. You can also investigate career and subject options, research university courses or contact a careers adviser.

Career Recommendations

Our career recommendations are based on the results of your assessments and questionnaires. On this page you can;

- Explore over 600 careers, with detailed information about entry routes and salaries
- Filter your suggestions by the highest qualification you expect to achieve
- Decide how much you want us to take your interests, talents and work preferences into account when suggesting careers.

The screenshot displays a web application for career recommendations. The main interface is titled 'CAREERS' and includes tabs for 'PROFILE', 'CAREERS', 'OPTIONS AT 16', 'OPTIONS AT 18+', 'PLANNER', 'INTERVIEW', 'NOTES', and 'SUPPORT'. A message at the top states: 'These careers are selected to match your profile. You can modify them, explore other careers, and add favourites.' The 'CAREER MIXER' section on the left allows users to filter careers by 'Highest Qualification I Hope To Achieve' (Degree) and various categories: Interests, Aptitudes, Talents, Workplace, Work Style, and Personality. Each category has checkboxes for 'A BIT' and 'A LOT'. The 'CAREERS' list on the right shows 15 careers with columns for 'Career', 'Rating', 'Favourite', and 'What I Need'. The careers listed are: Pharmacist, Biomedical scientist, Optometrist, Audiologist, Dietitian, Sport scientist, Genomics (Geneticist), Radiographer, Clinical psychologist, Business analyst, Educational psychologist, and Children's nurse. To the right, a 'WEBSITE DESIGNER' section shows a 'CAREER ROUTES' diagram. This diagram maps educational paths from GCSE to A-Level to Degree, showing how different subjects and qualifications lead to specific career routes, including 'Associated Level 3 course' and 'Web design or associated courses'. The diagram also mentions 'Advanced Apprenticeship or initial job with related qualifications'.

Your choices at 18

- If you are planning on going to university, we will suggest courses based on your aptitude results. If you can't decide what to study, you can take our study interests questionnaire for inspiration
- We have access to over 40,000 courses in British and European universities, so you can research the different options and understand the entry requirements
- If you wish to pursue an apprenticeship, you can explore the options available to you

I have not heard of Morrisby before, what are your credentials?

We have over 50 years' experience in developing psychometric assessments. Our impartial and accurate assessments continue to help millions of students and adults make important decisions about their future careers and education choices.

“The information from Morrisby.com has helped to strengthen my thinking on the next steps in my career plans and A Level choices.”
